

Atharva Barad

Seattle Metropolitan Area | 425-749-7338 | atharvambarad@gmail.com | linkedin.com/in/atharvambarad

Recent UW Business Administration graduate combining Python, SQL, Excel, quantitative modeling, and process analytics to turn complex data and uncertain assumptions into decision-support systems.

EDUCATION

University of Washington Bothell

Bothell, WA

Bachelor of Arts in Business Administration | GPA 3.64/4.00

Aug 2026

Academic focus: Finance and Management Information Systems | Annual Dean's List 2024-2025

PROFESSIONAL EXPERIENCE

United Indians of All Tribes Foundation

Nov 2023 - Nov 2025

Garden Intern Supervisor | Seattle, WA

- Rebuilt quarterly volunteer reporting from paper logs into digital forms and an Excel workflow using Power Query, PivotTables, VBA/macros, validation, and error flags, cutting preparation from **roughly 4-8 hours to about 40 minutes**.
- Designed validation and correction controls around required fields, timestamps, activity records, evidence, and reporting exceptions so incomplete submissions could be caught before quarterly consolidation.
- Prepared **8 quarterly compliance reports** across overlapping grant cycles, reconciling deliverables, expenditures, volunteer activity, and program outcomes.
- Used filters, lookups, charts, and forms integration to support repeatable reporting and faster retrieval of volunteer and program records.

SELECTED ANALYTICS & DATA PROJECTS

Monte Carlo International Expansion Research

Summer 2026

B BUS 499 Independent Study | Python / Monte Carlo | Grade 4.0

- Built a Python Monte Carlo model for a 15-year, six-warehouse expansion, evaluating **12 scenarios x 10,000 paths each** across **23 stochastic country variables**.
- Estimated empirical marginals and dependence structure, translated country conditions into financial drivers, and compared NPV/IRR, downside, financing, and rollout behavior across three strategies.
- Validated **157 archived core/FX/financing checks** plus reproduction of all 12 scenarios, emphasizing distribution-based decision support rather than single-point forecasts.

UniPath Student Lifecycle Platform

Mar - Jun 2026

B BUS 489 Five-Person MIS Capstone | PostgreSQL / Python | Grade 3.9

- Designed a normalized **34-table PostgreSQL schema/ERD** with UUID primary keys, explicit foreign keys, and junction relationships spanning university search, applications, academic progress, and alumni outcomes.
- Built the Python proof of concept for multidimensional ranking, semantic matching, calibrated admission estimates, and early-warning academic-risk workflows using **synthetic/prepared data**.
- Co-developed broader six-layer architecture and API/data-flow concepts with the team, integrating the schema and analytical prototype into the shared system design.

CSS 475 Database Systems

2026

PostgreSQL / SQL Coursework and Team Database/API Work

- Built and tested PostgreSQL/SQL functionality using schemas/ERDs, parameterized queries, joins, reads/writes, input validation, and Python-backed database APIs.
- Applied database design, retrieval/update, application integration, transactions, and optimization concepts, supporting working SQL/PostgreSQL capability rather than enterprise DBA claims.

Costco Singapore Market Entry

Mar - Jun 2026

B BUS 480 Team Project | Country Screening / Financial Research / QA | Grade 4.0

- Spearheaded the country-screening model by structuring the framework, researching inputs, helping define criteria, and validating data/scoring used to compare Singapore, South Korea, and Japan.
- Performed cross-module QA on statistics, assumptions/settings, appendices, and final formatting while connecting the screening output to pricing, financial, and operating considerations.
- Extended the country comparison into **PESTLE/CST, localization, membership pricing, 3-year financial assumptions, and entry-mode/logistics** rather than stopping at a composite score.

SKILLS & CREDENTIALS

Analytics & Data: Python, pandas, NumPy, SQL/PostgreSQL, Excel formulas, PivotTables, Power Query, VBA/macros, validation, Tableau; Power BI working knowledge.

Methods: Monte Carlo, scenario/sensitivity analysis, relational modeling, data validation, requirements/workflows, testing/QA; BMC credential.
